

Clonar un repositorio en Visual Studio

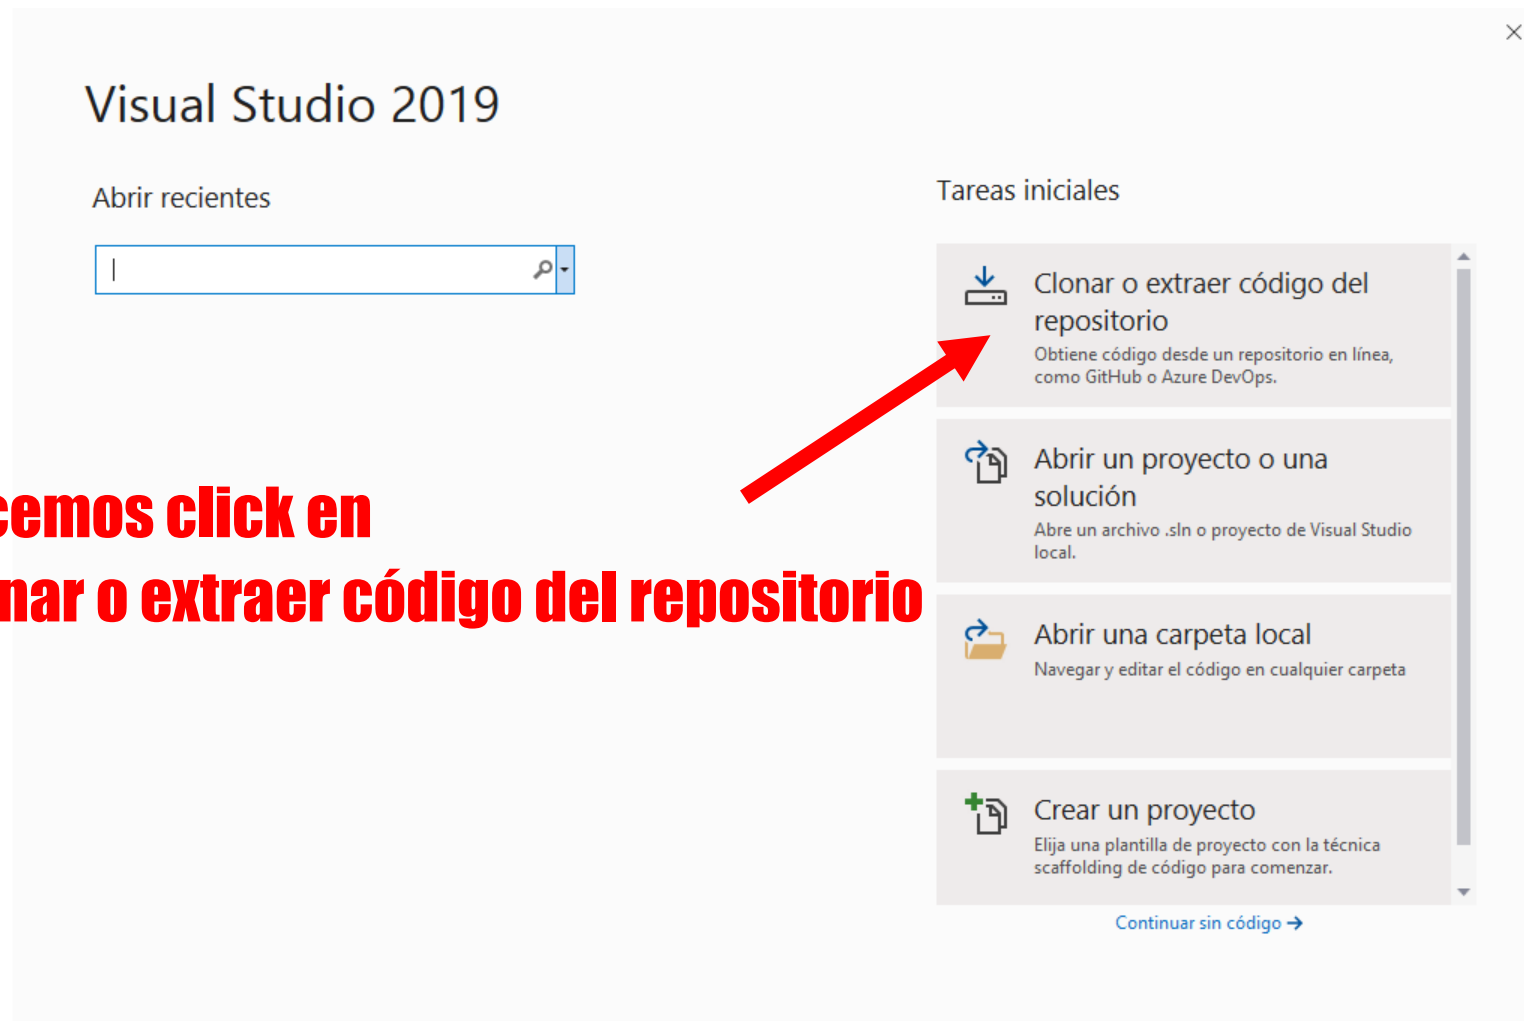

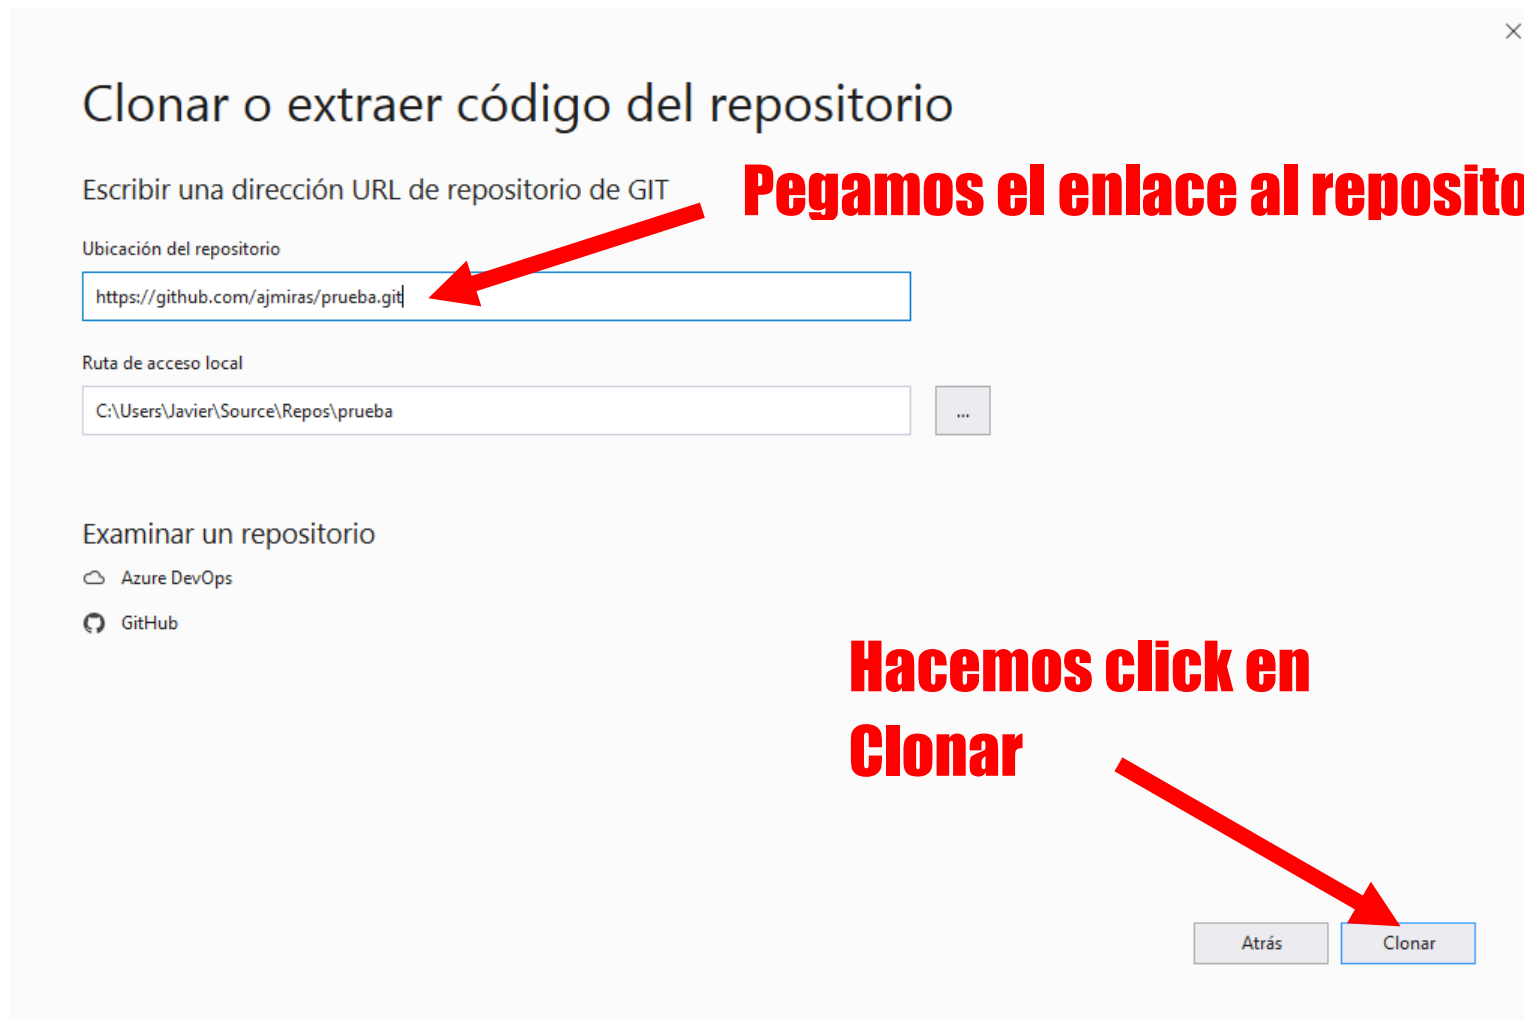

The screenshot shows a GitHub repository named 'prueba' by user 'ajmiras'. The repository is private and has 3 commits, 1 branch, and 0 packages or releases. The 'Clone or download' button is highlighted with a red arrow. A red text overlay says 'Hacemos click en Clone or download'. Below the button, a dropdown menu is open, showing the 'Clone with HTTPS' option. A red arrow points to the URL 'https://github.com/ajmiras/prueba.git' in the dropdown, with a red text overlay saying 'Copiamos el enlace al repositorio'.

Hacemos click en Clone or download
